**(54) TREATING AGENT FOR TERMITE REPELLENCE AND ANTISEPSIS****(57)Abstract:**

**PROBLEM TO BE SOLVED:** To obtain the subject treating agent not only having heightened repellent activities against white ants and improved termite-repelling activities but also having high antiseptic activities by including silafluofen and hinokitiol.

**SOLUTION:** This treating agent contains (A) silafluofen {4-ethoxyphenyl [3-(4-fluoro-3-phenoxyphenyl)propyl]dimethylsilane}, and (B) hinokitiol or an essential oil containing the same (e.g. *Thujopsis dolabrata* oil derived from *Thujopsis dolabrata* timber). Synergistic activities are manifested by formulating the component A with the hinokitiol in a proportion of (50:1)-(1:1) in the treating agent. When (C) 3-iodo-2-propynylbutylcarbamate(IPBC) is formulated therewith, the treating agent having higher antiseptic properties is provided. The formulating ratio of the components A to C is preferably (1:2)-(1:20).
